COMPANY OVERVIEW

Founders | IIT Delhi Alumni

In 2015, IIT Delhi graduates **Vidit Aatrey** and **Sanjeev Barnwal** co-founded a fashion startup called **Fashnear**, with a mission to enable online selling for everyone. The startup failed, but the following year they revived the platform and renamed it **Meesho**.

Vidit Aatrey
CEO

Sanjeev Barnwal
CTO

Journey

Scale that matters

Revenue streams

- Logistics** (Shipping & Fulfilment) Biggest Revenue line
- Advertising** (Promoted Listings) Fastest growing revenue stream
- Value-added-Services (VAS)** Financial Services, Valmo

Valmo handles 62% of Meesho's orders, lowering costs by roughly 12%

THE MONETIZATION GAP

Unit Economics Today

Order Journey

The Hidden cost of Tiny Profit

- 75% COD orders are successful = 1 in 4 COD orders fail.
- 1 failed COD order = 2 X logistics cost + 0 Revenue
- Wipes out profit from ~ 4 successful orders
- High COD + RTO = Low Margin Business

Goal

Introduce willingness-to-pay for premium delivery among budget buyers

What the market is telling us

PRIMARY RESEARCH

Understanding user's perspective from surveys and in depth conversation

Objective

Understand user behaviour, pain points, expectations

Approach

Google Form Surveys and personal interview calls

Total Response

Respondent Profile

Target Sample Focus

Key Insights

Core Purchase Drivers

- 77.1% of users rank lowest price as their absolute top priority when placing an order.
- 54.3% emphasize that trust in the product (reviews/ratings) is a non-negotiable decision trigger.

Friction & Abandonment Triggers

- 37.1% of buyers will **immediately abandon their cart** if an unexpected delivery fee appears on a low-priced item.
- Flimsy packaging (68.6%) and **zero product reviews** are the primary causes of drop-offs

Monetization Opportunities

- 65.7% of users state that a **guaranteed delivery date** is the number one feature that makes faster delivery worth paying for.
- ~75% of your total audience is open to paying an extra premium between ₹20 to ₹50 if explicit delivery value is locked in and guaranteed.

Personal Interview Transcripts

STUDENT

"I buy casual clothes on Meesho because of the low prices. I would willingly pay a small fee of ₹20–30 if it guarantees the item arrives early for an event, but premium packaging is a waste of money for basic clothes."

WORKING PROFESSIONAL

"I routinely switch to Meesho when the exact same product is cheaper there, but I've abandoned my cart due to zero reviews. I'd pay extra for fast delivery only if I can choose the exact delivery date upfront."

HOMEMAKER

"My tolerance for extra fees strictly sits at ₹20–30, with a hard cap at ₹50. I once paid extra for gift packaging on another platform, but it felt low-quality and added almost no real value."

RETIRED

"Delivery speed isn't my core problem—item accuracy is. I care about review quality and getting the right product. Meesho needs to clean up low-quality duplicate sellers before asking me to pay for faster delivery."

What the market is telling us

Secondary Research

USERS POV

Girish K Gangadharan

★★★★★

15/06/2026

One of the worst shopping platforms I've ever used —and this was my first order. After 11 days, my order finally reached a hub just 3 km away from me. Yet the tracking page shows 6 more days for delivery. Six days to cover 3 km? That's insane. The funniest part is that the expected delivery date keeps changing in the app. If you order from Meesho, avoid paying online in advance. At least then you can cancel or reject the order if needed. Meesho, you made me Mee-slow.

Product depends on the amount you are willing to spend on what you're buying . Personally I find it very convenient .unlike any other shopping apps Meesho offers great value for money .The best part is that Returns refunds are done in a minute you don't need to worry about your refund which makes the shopping experience so much easier hassle-free

sahil malik

★★★★★

09/06/2026

Meesho is a very user friendly shopping app qite a wide variety of products at affordable prices. I really like the difference and deals available on clothing after 10-15 products, there's no way to go back to the home page directly. I have to use the phone's back button or the top-left arrow, which is frustrating. It's a great platform for budget-friendly shopping🥰❤️

★★★★★

09/10/2024

You cannot ask for a worse shopping app than this. They show you the cheapest price of a product and once ordered, they don't ship it for 7-8 days and cancel the order automatically. The only customer support they got is an incompetent AI which only has pre-loaded set of 3-4 answers which keep on repeating. Go for this app if you want to debit money from your account and then received back as refund after 10 days. Other than this, this app is of no use.

bopu_1986

@meesho, horrible and pathetic experience with your shopping website and app, i have undergone issues and bad services more than 20 times still no improvement, The customer support team ignored the customer due to a lack of knowledge and due to immaturity

The Problem

01 Meesho operates on extremely **thin margins** due to low AOV, high COD dependence, high return rates and **logistics heavy model**.

- Low contribution margin per order
- High RTO & COD related costs
- Unit economies break on returns
- Growth not translating to profits

Trust Gap (not speed gap)

02 Users don't complain about delivery speed, they worry about **product quality, accuracy & reliability**

- “Will i get what i see?”
- Quality inconsistency
- Fear of bad experience
- Returns are a trust tax

Buyer Identity

03 Meesho buyers are **value-conscious, aspirational and price sensitive** first-time online shoppers.

- Bargain seekers & Deal driven
- First Time/ value ecommerce users
- High price sensitivity
- Trust built through community & reviews

The Opportunity Signal

04 Strong demand, large market & growing repeat usage signal a **huge monetization opportunity**.

- Large untapped monetization space
- Cross-sell & value-add potential
- Build Trust → reduce returns → improve margins

Reading the field

Competitive Benchmarking

Where competitors play

HOW THE MARKET MONETIZES DELIVERY

Every player has a lever. Meesho doesn't.

Player	Speed	Lever	Cost
Meesho	4 - 5 Days	—	₹0

Online Aggregators

Amazon	1 - 2 Days	Subscription	₹1499/yr
Flipkart	2 - 3 Days	Tiered Loyalty	Perks based
Myntra	3 - 5 Days	Insider Tiers	Perks based

Quick Commerce

Blinkit	10 Mins	Per Order Fee	₹15-30/order
Zepto	10 Mins	Pass Subscription	₹99/3months
Swiggy IM	10 Mins	Bundled sub	₹1499/yr

1 Meesho is the lone non-monetizer

Every other e-commerce player captures revenue through fees, loyalty, or subscriptions. Meesho gives delivery away free — on a ₹17-20 margin per order.

2 Subscriptions sell speed. Per-order sells certainty.

Prime, Swiggy One, Zepto Pass exist because their users came for speed. Meesho's users want neither — they want to know it'll arrive when promised.

3 The whitespace: per-order certainty

A ₹20-50 fee for guaranteed-date delivery matches the WTP found in primary research. No competitor in India runs this model today.

USER PERSONA 1

THE BUDGET PURIST
SAKSHI SINGH

20 yrs - Student - Jaipur, Rajasthan - Meesho user since 2022

IN HER OWN WORDS

"I'm not in a hurry for a kurta.
Why pay extra to get my order
two days earlier?"

Who she is

Fixed-budget student.
Deliberate with every
rupee.

Primary goal

Lowest price +
trustworthy reviews
before anything.

Behaviour

Compares 3 apps
monthly buyer, always
COD.

Key value

Proof over promise
Reviews decide every
order.

About

Second-year student on a fixed allowance.
Scrolls Meesho, Amazon, and Myntra before
buying anything. Waits a week for a price drop
rather than paying full today. Saving money
isn't a habit. It's her identity as a consumer.

Budget-first

COD only

Tier 2 City

Review-driven

Goals

- Chatbot support with copy-paste replies, no resolution
- 20+ reviews minimum before any purchase
- Easy returns if the product looks nothing like the photos
- Too many duplicate listings — same product, different prices, no clarity

FRUSTATIONS

- Order shows "delivered" — nothing arrived
- Chatbot support with copy-paste replies, no resolution
- Review quality feels fake — can't gauge product quality reliably

MEESHO ANGLE

Don't charge her. Win her with trust signals, verified reviews, OTP delivery, clear return flow. Revenue comes from her volume, not add-ons.

USER PERSONA 2

THE CONDITIONAL SPENDER
MEGHA VARMA

26 yrs • Working Professional • Lucknow, Uttar Pradesh •
Meesho user since 2021

IN HER OWN WORDS

“Speed doesn't matter. Keeping the promise does. I'm fine with 7 days — just don't promise 5 and deliver on 9.”

Who she is

Early career professional. Has discretionary income but spends it with intention.

Primary goal

Get the best value not the lowest price. Outcome predictability matters.

Behaviour

Shops 2–3x/month across apps. Discovers via Instagram. Compares before buying.

Key value

Reliability and certainty she'll pay extra only when the outcome is guaranteed.

About

Mid-income professional who shops across Amazon, Myntra, and Meesho based on what she needs. Not platform-loyal — outcome-loyal. Will pay a little extra, but only when the result is clearly guaranteed.

Multi-platform

Prepaid

Tier 1 City

Outcome-driven

Goals

- Delivery dates that shift without notice — ruins plans for gifting or events
- No way to lock a delivery slot even when she's willing to pay for it
- Paid for gift packaging on Blinkit once — overpriced and disappointing

FRUSTATIONS

- Delivery dates change unexpectedly
- Support channels that can't actually resolve issues, only acknowledge them
- No way to lock a delivery slot even when she's willing to pay for it

MEESHO ANGLE

Will pay ₹20–40 for guaranteed delivery. A ₹39/month membership with priority support becomes valuable if the promise is reliable.

M Megha Verma

★★★★☆ · 08/04/24

Meesho has amazing prices and great variety, which is why I shop here often. But delivery dates keep changing at the last minute, which makes it difficult when I'm ordering for events or gifts. There's no option to lock a delivery slot even if I'm willing to pay. I also didn't like the gift packaging I paid for once — it was overpriced and not worth it. Support takes too long and doesn't really resolve the issue.

Simple post-delivery review encourages feedback

No guaranteed delivery date lock at checkout , delivery feels uncertain

Size & Fit Mismatch

What Meesho needs to fix right now

These aren't new features they're broken experiences. No premium tier works until these are fixed first

? What's New ?

Filters, Sort and Category chips moved to a sticky bar above the product grid.

★ Why It Matters ?

Visible the moment the app opens - no scrolling needed.

📈 Impact

Faster path to relevant products, less drop-off at Step 1, higher browse-to click conversion.

? What's New ?

Search and Filter added to Reels, letting users find specific products without leaving the feed.

★ Why It Matters ?

Turns passive scrolling into intent-driven discovery, closing the gap between inspiration and purchase.

📈 Impact

Improved product discovery, stronger engagement, higher add-to-cart rate.

Feature Suggestion

What Meesho should build next

Three features backed by primary research, user interviews and DRHP data

Short Term

Smart Bundle Add-Ons

What it is

Complementary product suggestions at checkout belt with pants, earrings with kurti, pillow covers with bedsheet.

Who it's for

Both personas. No extra trust or upfront commitment needed — cautious first-timers can ignore it freely, while repeat buyers with higher catalog trust are more likely to act on it..

Why It Compounds

Medium Term

Paid Express Delivery + Proof Videos

What it is

A single opt-in checkbox at checkout. One tap adds ₹9 to the order total in exchange for earlier delivery and safer packaging.

Who it's for

All users are willing to pay when the outcome is clear. some user will use during gifting or events when timing matters.

Why It Compounds

Moonshot

Meesho Plus Subscription

What it is

₹1 trial with guaranteed delivery, faster returns, premium packaging auto-converts to a low-cost monthly plan.

Who it's for

22.9% said yes to paid membership, 37.1% said maybe when certainty of outcome is the pitch.

Prototype for Meesho Plus

Why It Compounds

Expected Impact and Trade offs

The numbers behind our feature bets

Conservative estimates based on Meesho DRHP (FY25) data — 183 crore orders • 19.9 crore users • ₹43.08 avg fulfilment cost

F1 — Smart Bundle Add-Ons Short Term

Guesstimate

Estimated annual revenue impact
~ ₹53 Cr

+₹440 Cr additional GMV at 12% take rate

- Key assumptions
- 183 crore total orders (FY25 DRHP)
 - 12% bundle adoption rate
 - ₹20 avg order value increase per bundle
 - 12% Meesho marketplace take rate

Bundled orders	$183\text{ Cr} \times 12\% = 22\text{ Cr}$
⇓	
Additional GMV	$183\text{ Cr} \times 12\% = 22\text{ Cr}$
⇓	
Revenue (12% take)	$₹440\text{ Cr} \times 12\% \approx ₹53\text{ Cr}$

Trade Off

Not investing in delivery infrastructure yet.

Poorly matched bundles can hurt checkout conversion Requires ML recommendation quality and seller catalogue depth — both have upfront build cost.

F2 — Paid Express Delivery Medium Term

Guesstimate

Estimated annual revenue impact
~ ₹243 Cr

Direct fee revenue — no take rate deduction

- Key assumptions
- 183 crore total orders (FY25 DRHP)
 - 15% express attach rate at checkout
 - ₹9 flat fee per express order
 - Direct revenue — not GMV dependent

Express orders	$183\text{ Cr} \times 15\% = 27\text{ Cr}$
⇓	
Direct revenue	$27\text{ Cr} \times ₹9 = ₹243\text{ Cr}$
⇓	
No take rate cut	₹9 is a direct buyer fee

Trade Off

Not building a subscription yet.

Per-order opt-in creates friction repeat buyers re-decide every checkout. If express delivery fails, trust damage is worse than a standard miss.

F3 — Meesho Plus Subscription Moonshot

Guesstimate

Estimated annual revenue impact
~ ₹1,375 Cr

₹2.8 Cr trial + ₹1,372 Cr subscription revenue

- Key assumptions
- 19.9 crore annual users (FY25 DRHP)
 - 14% trial adoption rate at ₹1 for Month
 - 25% trial → paid conversion rate
 - 4 months average paid subscriber tenure

Trial users (Month 1 @ ₹1)	$19.9\text{ Cr} \times 14\% = 2.8\text{ Cr}$
⇓	
Trial revenue	$2.8\text{ Cr} \times ₹1 = ₹2.8\text{ Cr}$
⇓	
Paid subscribers	$2.8\text{ Cr} \times 25\% = 70\text{ L}$
⇓	
Subscription revenue	$70\text{ L} \times ₹49 \times 4 = ₹1,372\text{ Cr}$

Trade Off

Not profitable without fixing base delivery first.

Driving repeat purchases, trust and sustainable growth for Meesho

OUR NORTH STAR & L1 , L2 FRAMEWORK

NORTH STAR METRIC

Incremental Revenue Per Order (IRPO)

Captures how effectively Meesho monetizes each order through optional premium features. A higher IRPO reflects successful feature adoption and sustainable revenue growth.

Revenue generated from new monetization features

÷

Total Orders

Key (L1) Metrics

These are the key levers that directly impact our North Star.

Bundle Attach Rate

Measures the percentage of orders where customers purchase a Smart Bundle along with their main product.

Formula

$$\frac{\text{Orders with Bundle Add-on}}{\text{Total Orders}}$$

Express Delivery Opt-in Rate

Measures the percentage of customers choosing Express Delivery. A higher rate indicates stronger adoption of the premium convenience feature

Formula

$$\frac{\text{Express Delivery Orders}}{\text{Total Orders}}$$

Lite Trial - Paid Conversion

Measures the effectiveness of the Lite Trial in converting trial users into paid premium subscribers. h.

Formula

$$\frac{\text{Paid Subscribers}}{\text{Trial Users}}$$

SUPPORTING (L2) METRICS

These validate our key levers and help us improve

Cart-to-Purchase Conversion

Improving funnel efficiency turns more adds-to-cart into purchases, raising overall order count.

Formula

$$\frac{\text{Orders Placed}}{\text{Carts Created}}$$

Average Order Value

Enhancing bundling raises revenue per order. AOV supports long-term growth and stronger unit economics.

Formula

$$\text{AOV} = \frac{\text{Total Revenue}}{\text{Total Orders}}$$

PROJECT SUMMARY

What We Did, How We Did It, and What Makes Our Approach Different

WHAT WE DID

- **Secondary research:** reviews, DRHP, & competitive benchmarking across 6+ industry reports
- **Primary research:** 63 survey responses, 9 in-depth interviews across 4 user segments
- Built **2 personas** and mapped the full **7-stage user journey** for trust signals
- Delivered a 3-phase monetization roadmap with a **North Star metric** framework

HOW WE DID IT

- Triangulated secondary industry reports with primary survey and interview data
- Benchmarked delivery monetization levers across aggregators and quick-commerce
- Mapped trust builders vs. trust breakers stage-by-stage across the funnel
- Prioritized features using the Kano Model and a proprietary synthesis framework

WHAT'S UNIQUE ABOUT US

- Reframed the core problem as a trust gap, not price or speed – and quantified it
- Built a proprietary Trust Flywheel connecting fixes to compounding revenue
- Sequenced recommendations by priority tier, not a flat feature wishlist
- Grounded every claim in 63 responses, 9 interviews, DRHP, and 5 industry reports

THE SOLUTION: What Meesho Should Build Next

SHORT TERM

Smart Bundle Add-Ons

Passive checkout upsell — no added trust or commitment required from budget-first buyers.

Guesstimate: with 12% adoption across 183 Cr orders and a ₹20 AOV lift, this could add ~₹53 Cr in revenue.

MEDIUM TERM

Paid Express + Proof Videos

₹9 opt-in for earlier delivery with visual proof of safe, on-time packaging.

Guesstimate: with 15% attach across 183 Cr orders at a flat ₹9 fee, this could generate ~₹243 Cr.

MOONSHOT

Meesho Plus Subscription

₹1 trial converting to a low-cost plan once delivery reliability holds firm.

Guesstimate: with 19.9 Cr users, 14% trial uptake, and 25% converting to paid at ₹49/month for 4 months, this could bring in ~₹1,375 Cr.

 **North Star:**
Incremental Revenue
Per Order
